

CALL FOR PAPERS
THE FIFTH INTERNATIONAL CONFERENCE ON NETWORKED SYSTEMS
NETYS 2017

May 17 - 19, 2017, Rabat, Morocco
<http://www.netys.net>

Aim and Scope: NETYS aims to bring together researchers and engineers from both the theory and practice of distributed and networked systems. The scope of the conference covers all aspects related to the design and the development of these systems, including, but not restricted to, multi-core architectures, concurrent and distributed algorithms, parallel/concurrent/distributed programming, distributed databases, big data applications and systems, cloud systems, networks, security, formal verification, etc.

NETYS will provide a forum to report on best practices and novel algorithms, results and techniques on networked systems. Original contributions as well as case study papers on the principles, design, implementation, modeling, analysis, verification, and application of networked systems are solicited. Specific concepts common to different forms of such systems are most welcome.

Paper submission: NETYS is soliciting two forms of papers: full and short papers. Full papers are allowed a maximum of 15 pages in Springer's LNCS format, whereas short papers are allowed a maximum of 5 pages (in the same format), both in the submission and in the proceedings.

A full paper submission might be accepted as such, as a short paper or a poster. A short paper may be accepted as such or as a poster. Posters will be presented at the conference to reflect work in progress. Authors are given the option to accept or not the type in which their paper is selected for acceptance.

Submission instructions: All submissions should follow the LNCS template. Submitted papers must be written in English. Full papers are allowed a maximum of 15 pages in LNCS format, whereas short papers are allowed a maximum of 5 pages, both in the submission and in the proceedings. Papers exceeding these limits may be rejected without review. The papers must be submitted electronically at:

<https://easychair.org/conferences/?conf=netys2017>

Publication: Springer's Lecture Notes in Computer Science series will publish the proceedings of the conference (www.springer.com/lncs). It is required that each accepted paper be presented at the conference by one of its authors.

The Computing Journal could publish extended versions of selected papers (www.springer.com/computer/journal/607).

Awards: Awards will be given to the best paper and the best student paper. A paper is eligible for the best student paper award if at least one of its authors is a full-time student at the time of submission. This should be indicated in the submission.
